

CIS-25 Assignment-week 8: Screenshot of my code and output

Code:

```
1  #include <iostream>
2  #include <fstream>
3  #include <string>
4  using namespace std;
5
6  //Creating a class name BankAccount
7  class BankAccount {
8      private:
9          double balance;
10     public:
11         BankAccount(){
12             balance = 0.0;
13         }
14         void deposit(double amount) {
15             balance += amount;
16             cout<<"Your current balance is: "<< balance <<"\n";
17         }
18         void Purchase(string item, double price){
19             if (price > balance){
20                 cout<<"funds insufficient.Your current balance is: "<< balance <<endl;
21             } else {
22                 balance -= price;
23                 cout <<"Purchased "<< item <<endl;
24                 saveTransaction("Purchase - " + item, price);
25             }
26         }
27         void DisplayBalance(){
28             cout <<"Current balance: $"<<balance<<endl;
29         }
30         void saveTransaction( string type, double amount){
31             ofstream file("transaction.txt", ios::app);
32             if (file.is_open()){
33                 file<< type <<": $" << amount << endl;
34                 file.close();
35             }
36         }
37 };
38
39 //my main block
40 int main(){
41     BankAccount myAccount;
42     myAccount.deposit(1000.00);
43     myAccount.Purchase("Airpod", 280.00);
44     myAccount.Purchase("Apple Watch", 700.00);
45     myAccount.DisplayBalance();
46     return 0;
47 }
